

BRAZIL

SAIPEM – FPSO CIDADE DE VITÓRIA

ACCOMMODATION AND LIFT IN PERFECT RYTHM!

Our DP3 vessel, Telford 28, moved in time with the client's FPSO Cidade de Vitoria operated for Petrobras on its Golfinho field, offshore Brazil. Installed in 1400m water depths, the T28 supported for more than six months the development of Petrobras' first ultra-deepwater project in the Esperito Santo Basin.

SAIPEM – FPSO CIDADE DE VITÓRIA

A Telford vessel was used for the first time in Brazil to provide DP3 accommodation support, lifting operations, storage and logistics services during the modification works on the FPSO Cidade de Vitória, located in ultra deepwater offshore Brazil.

The contract had been awarded by Saipem, owner and operator of the FPSO Cidade de Vitoria, on lease by

Petrobras for its Golfinho oil and gas field located in the Campos Basin in 1400m water depth.

For this first contract for the company in Brazil, the DP3 Telford 28 (ex Jascon 28), which had just been upgraded, delivered a combination of services including accommodation support services, lifting operations, storage and logistic support services to Saipem's FPSO.

The scope included:

- Accommodation support services for 300+ POB
- Lifting operations
- Storage support
- Logistic support
- Gangway connection
