

MALAYSIA

SABAH SHELL - MALIKAI

ACCOMMODATION

THE HANDOVER

Malikai is Shell's second deepwater project in Malaysia. It features the country's first tension leg platform, a floating oil production facility moored to the seabed 500m underwater. Interestingly, Telford 34 performed a handover to Telford 25, her sister ship, during the Project extension period, as she was called upon to execute construction and pipelay works on the other side of the world.

SABAH SHELL PETROLEUM / MALIKAI, SABAH

A contract was awarded from Sabah Shell Petroleum Company Limited for the provision of accommodation services. The contract covered services for the Malikai deepwater development project, located 100 km off Sabah, Malaysia, at a water depth of around 500m. The platform is located within the area of the Block G Production Sharing Contract in the South China Sea.

The scope of work consisted of accommodation support services for 200 construction personnel. The contract was for a period of 2 months + 2 months options. Telford 34 (ex Jascon 34), a DP3 Accommodation Pipelay Construction vessel, was selected for this project.

The vessel features accommodation facilities for max. 335 persons and was connected to the Malikai Tension Leg Platform via its active heave compensated telescopic gangway.

In October 2016, Telford 34 was replaced by Telford 25 (ex Jascon 25) in Labuan to allow the Telford 34 to meet a follow on commitment

in Argentina (Strait of Magellan). All company personnel transferred via the Marine Aluminium hydraulic heave compensated gangway at offshore location.

The sister ships maintained their relative positions on DP. Client's equipment and personnel were transferred as well as our own project equipment, which involved numerous vessel to vessel lifts. Another advantage of our vessels thanks to their combined capabilities.

Telford 25 remained connected to the Malikai facility up until late November 2016. Production from the project was achieved in December 2016.

PROJECT OVERVIEW

CLIENT

Sabah Shell Petroleum Company

PROJECT

Malikai deep-water development project

LOCATION

Block G, 100 km off Sabah - Malaysia

PROJECT TYPE

Accommodation services

CONTRACT PERIOD

July - November 2016

VESSEL

TELFORD 34, later replaced by TELFORD 25
