

Telford Offshore Expands Fleet Offering

Telford Offshore is pleased to announce that it has signed a long-term bareboat charter for the vessel "**Guo Hai An Hong**" (formerly known as the *African Provider*). The charter is set to commence in Q2 2025, and upon delivery, the vessel will be renamed "**Telford 33**".

The vessel, a 2021-built DP3 Multi-Purpose Support Vessel (MPSV), provides accommodation for up to 684 persons and available free deck space of 2,000m². It is equipped with a 300-tonne heavy-duty crane and a heave-compensated gangway, making it a highly versatile addition to the fleet.

Robert Duncan, CEO of Telford Offshore, stated: "The profile and capabilities of the **Telford 33** are a perfect complement to those of our existing fleet. The addition of this vessel will enhance our ability to support clients across our core strategic regions of MENA and West Africa, and will be targeted at specific contract opportunities in these regions. By adding this vessel to our fleet, it provides us with a platform to gain greater market share, and further consolidates our position as the largest owner / operator of DP3 MPSVs globally."
